

JORDAN RIVERA

Product Analyst · Experimentation & Retention Analytics

📍 London, UK ✉ jordan.rivera@example.com ☎ +44 20 7946 0123 🌐 jordanrivera.example

Summary

Product analyst with three years at a subscription app: designed and analysed **40+** A/B tests (**30+** shipped) and built the dbt KPI layer 5 teams use as their single source of truth. Automated the weekly KPI report, cutting preparation from ~6 hours to ~45 minutes. MSc in Business Analytics; works in SQL, dbt and Python.

Professional Experience

Product Analyst

Mar 2022 – Aug 2025

Northwind Apps, London, UK

- Designed and analysed **40+** A/B tests on onboarding, paywall and notification flows, from hypothesis and power analysis to a ship/no-ship recommendation; **30+** shipped.
- Built a SQL + dbt KPI layer (activation, retention, revenue) used by 5 product and marketing teams as their single source of truth.
- Automated the weekly KPI report with Python and scheduled dbt runs, cutting preparation from **~6 hours to ~45 minutes**.
- Built a churn-prediction model (logistic regression) that ranked at-risk subscribers and improved save-offer targeting.
- Defined the event tracking plan for the new onboarding flow with engineering: 18 events and their properties.

Data Analyst Intern

Jun 2021 – Sep 2021

Harbor Retail Group, London, UK

- Cleaned and reconciled 2 years of store sales data in Excel and SQL for the pricing team.
- Built a weekly Tableau dashboard of promotion performance for 4 category managers.

Skills

Tools & Languages

SQL, dbt, Python (pandas, scikit-learn), Tableau, Looker Studio, Excel, Git.

Analytics & Methods

A/B testing & power analysis, KPI modelling, churn prediction (logistic regression, gradient boosting), event tracking plans, stakeholder reporting.

AI & Automation

AI-assisted analysis & coding (ChatGPT, GitHub Copilot), report automation (Python, dbt).

Education

MSc Business Analytics · Northbridge University

Sep 2021 – Sep 2022

- Dissertation: uplift modelling for retention offers.

BSc Economics · Kingsbridge College

Sep 2018 – Jun 2021

Languages

English Native Spanish C1 German A2

Projects

Churn Radar — Personal Project · [Live demo](#)

2025

- Built an open-source churn dashboard on a public telco dataset: survival curves, cohort retention and a gradient-boosting model (AUC 0.84 on a held-out set).

Technologies Python, scikit-learn, DuckDB, Streamlit.
